

EEAFA**Activities Transportation**

In so far as is possible, all students participating in school activities will be required to ride the school bus to the school activity.

A faculty sponsor shall be in charge of each trip and will be responsible for maintaining a degree of order that is conducive to the safe operation of the vehicle. The faculty sponsor will also be in charge of insuring that the bus is cleaned up following a stop at any eating establishment.

All students that are being transported to school events by school buses must return on those buses unless the sponsor is notified personally or in writing by the parent or parents of the students to ask permission for their child to ride home with them.

If, for the sake of convenience, a student is to ride with an adult other than the parent, personal contact from the student's own parent or written permission from the student's own parent will be required before permission will be granted. If a student is going to the activity other than on the bus, the sponsor shall be notified in advance of departure from school.

If parents are not present and do not notify the sponsor, the students shall ride the school bus home.
